

*Spartan Peripheral Devices will be exhibiting at the AHR Expo in Orlando February 7<sup>th</sup>, 8<sup>th</sup> and 9<sup>th</sup>. We will be at booth 1128 and look forward to seeing you there.*

**Spartan's** unique and innovative family of zone valves comes in 2-way, 3-way, and 3way with bypass (4 port) configuration. All are poured with low zinc bronze (no brass – no pitting) for decades of life. With fittings to suit all types of installations (including sweated in line), a type is available to suit all applications. The long-lived designs cater to the demands of building owners, cutting costs by simplifying service needs.

Internals are both replaceable, for servicing, and interchangeable, for ease of Cv resizing, all without removing the valve from the line. These are important benefits unique to **Spartan**

**Spartan** also features the most complete line of actuators (Thermostatic, Thermo-electric, electric gear motor, spring return or rest in last position as well as that old favorite pneumatic) to complement the line. All standard inputs are available 2-10Vdc; on/off; hi or low pressures; pulse width modulation; increase/decrease (raise/lower). Every actuator type is included in the **Spartan** line.

*No other supplier offers such flexibility; No other zone valve supplier provides such a diverse range.*
